**Subject:** Aandahl, Liz - Dog Solan (Final report 21.12.10 00:00:24) LabNr.GE89824519112010

**Finnsnes Dyreklinikk AS**  
**Postboks 228**  
**9305 Finnsnes**

Owner **Aandahl, Liz** Order ID **94950370**  
 Animal **Dog Solan** Laboratory No. **GE898245/19.11.2010**  
 Material **EDTA blood**

## Clinical information:

Dog, Solan Golden Retriever 977 200 007 641 740 no information

Test	Result	Sign	Reference value	Unit	Remark
<b>Moleculargenetical examination of the hereditary disease PRA (type prcd)</b>					1)
Mutation	<b>none</b>				
Genotype	<b>N/N</b>				
<b>Conclusion:</b>					2)

The tested dog is homozygous for the intact gene. It is not carrying the mutation for prcd-PRA, which is discussed as cause of this type of PRA. The risk for this dog to fall ill with this type of prcd-PRA is extremely low. The tested dog can be paired with any dog because the risk for the offspring to fall ill with prcd-PRA is very low.
